About Edify

Edify is a non-profit organization with a mission to improve and to expand sustainable, Christ-centred education globally.

Edify works with education entrepreneurs who operate Christ-centered schools in Africa and Latin America. Alongside local partners, we offer them access to the tools they need the most: training, loan capital, and education technology. This helps improve the quality of education, expand their schools, and increase sustainability.

PARTNERS IN UGANDA

Training

- Amani Initiative
- Awana Uganda
- Belief Christian Ministries
- Christian Schools Owner's Association
- Christian Teachers Africa
- Cornerstone Development Africa
- LeadMinds Africa
- National Curriculum Development Center
- New Hope International
- Pamoja Mission Support Ltd
- Scripture Union
- Sinai Education Services
- Uganda Christian University

Lending

- Hiinga Microfinance
- Lubaga Private Teacher's Sacco
- Saviour Microfinance

Ed Tech

- Kisubi Associated Writer's Association
- Sharebility Uganda
- Teki Consultants

Message from the Country Director

"You are the light of the world... let your light shine before others, that they may see your good deeds and glorify your Father in heaven"- Matthew 5:14-16

Dear readers,

It gives me great joy to welcome you to the Edify EdTech Exhibition 2025, a landmark event that celebrates creativity, innovation, and the transformative power of technology in education. This exhibition is more than just a showcase of projects; it is a testimony to the resilience, talent, and vision of our learners, teachers, and partner schools who continue to reimagine education for the 21st century.

As Edify Uganda, our mission is to support schools with the resources, training, and tools they need to provide Christ-centered, sustainable, and impactful education. Over the years, we have walked alongside schools through capacity-building programs and access to affordable EdTech loans, ensuring that every child can benefit from inclusive and innovative learning. This exhibition highlights the fruits of those efforts. From problem-solving ideas to technology-driven solutions, the projects you will see today demonstrate not only technical skills but also the values of teamwork, perseverance, and community impact.

I extend my heartfelt congratulations to the 20 finalist schools for their outstanding innovations, and I equally commend the more than 100 schools that participated in this journey. Your efforts remind us that the future of education in Uganda is bright. To the schools that did not make it to the finals, I encourage you to keep your EdTech clubs active, continue integrating ICT into project-based learning, and prepare for even stronger participation next year. Every step you take is a contribution toward building a culture of innovation and lifelong learning.

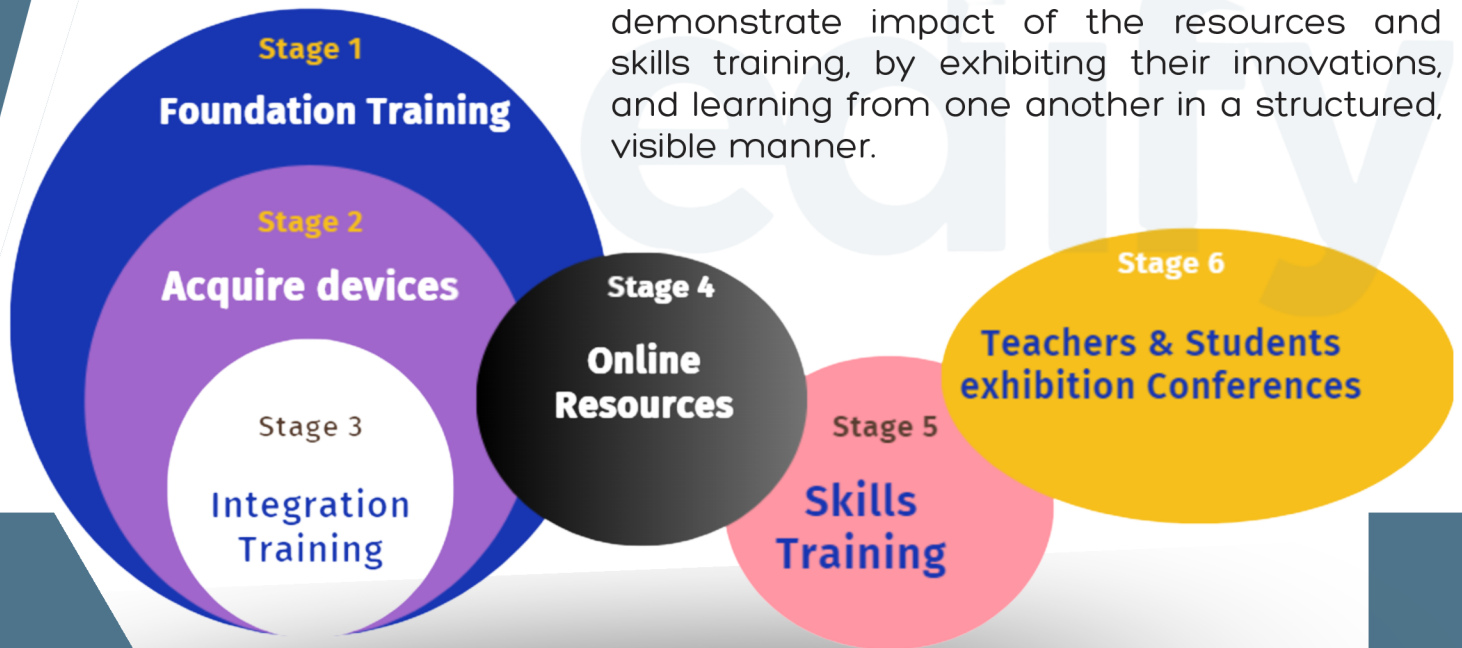

Finally, I express my gratitude to our staff, partners, and educators whose unwavering support has made this event possible. Together, we are shaping a generation of learners and educators who are not only digitally competent but also guided by values that honor God and serve communities.

May this exhibition inspire us all to dream bigger, innovate boldly, and work collaboratively towards sustainable, Christ-centered education in Uganda.

Josephats Mbaziira
Country Director, Edify Uganda.

ROADMAP OF EDTECH ACTIVITIES WITH EDIFY PARTNER SCHOOLS

Since 2019, Edify Uganda has supported a growing number of partner schools with access to affordable loans for acquiring EdTech devices, EdTech foundation trainings for school leaders, and in-school EdTech trainings for staff. The teachers and students exhibitions present an opportunity for schools to demonstrate impact of the resources and skills training, by exhibiting their innovations, and learning from one another in a structured, visible manner.

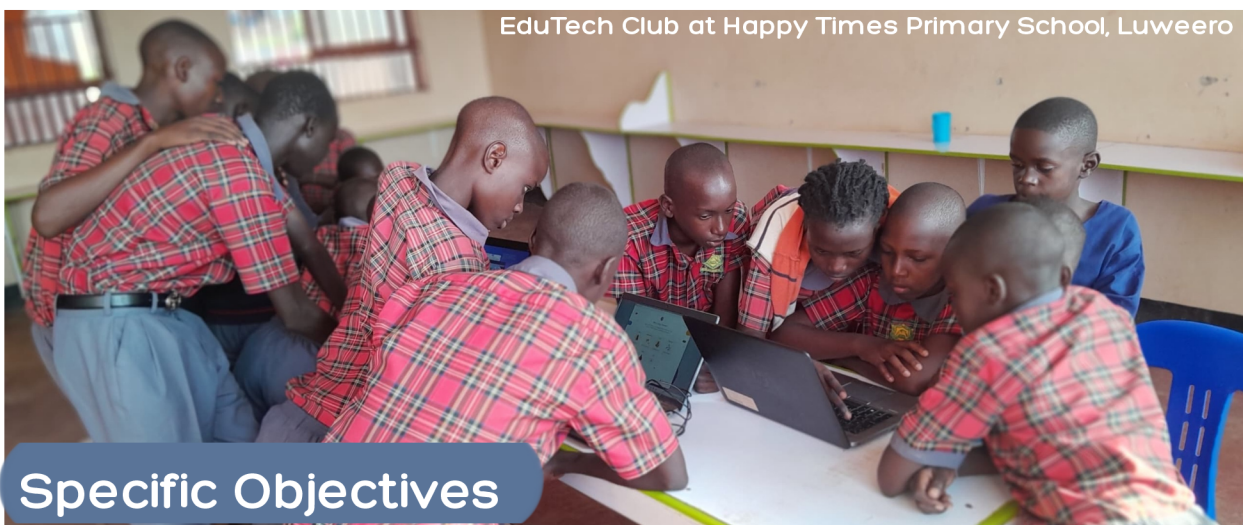

A staff meeting at Edify Uganda offices on Plot 9A, Ntinda View Crescent, Naguru, Kampala, Uganda

Overview of the Exhibition

The Edify EdTech Exhibition 2025 is designed to recognize, inspire, and scale learner-driven innovations in educational technology, grounded in the values of creativity, collaboration, digital responsibility, and Christian leadership. The exhibition seeks to amplify the outcomes of EdTech / ICT Club activities and encourage meaningful, values-based technology use across Uganda's basic education landscape.

This initiative supports national goals around digital skilling and grassroots innovation in line with the MoES digital agenda strategy, and directly complements Edify's mission of holistic, transformative education grounded in Christ-centered values.

EduTech Club at Happy Times Primary School, Luweero

Specific Objectives

- I. To provide a national platform for primary and secondary learners to present impactful digital solutions addressing classroom, school, or community challenges.
- II. To enhance creative problem-solving, collaboration, and 21st-century digital skills among learners through project-based competitions.
- III. To strengthen the capacity of teachers (EdTech Patrons) to mentor and guide students in responsible, values-aligned use of technology.
- IV. To increase visibility and documentation of EdTech innovations in schools.
- V. To encourage peer learning and knowledge-sharing between schools, regions, and partners across Uganda.
- VI. To promote the ethical use of digital tools, grounded in Christian values and digital safety principles.
- VII. To identify and recognize outstanding student teams and schools that demonstrate excellence, innovation, and digital leadership.
- VIII. To position Edify Uganda and its partners as key facilitators of locally driven, scalable digital transformation in education.

Understanding the Theme

The theme has three parameters that learners are encouraged to address in their projects:

1. **Creating Impact** - Does the project solve a real problem, improve lives, or address a specific need in the community or school?
2. **Technology Use** - Does the project meaningfully integrate digital tools, hardware, software, or computing concepts?
3. **Christian Values** - Does the project promote values such as compassion, stewardship, integrity, service, honesty, or faith in action?

Projects may emphasize one or more of these elements. Strong projects demonstrate how technology can serve people in ways that reflect Christ-like attitudes.

The poster for the Edify Uganda EdTech Exhibition 2025 features a vibrant orange and yellow background with a starburst pattern. It includes several circular images of students working on computers and a smartphone. The text is arranged in a dynamic, overlapping layout.

PROJECTS AT THE FINAL EXHIBITION

After technical vetting, below is the shortlist of 20 school projects which advanced to the finals of the inaugural Edify EdTech Exhibition 2025.

PRIMARY SCHOOLS

Busega Preparatory School, Kampala is to exhibit BusegaFlix Film Production, a learner-led YouTube channel creating wholesome Christian movies, empowering kids with educational entertainment that builds values and counters non-faith-based online content.

Destiny Preparatory School, Mukono is to exhibit A Smart Self-Paced Learning App, an interactive tool for anytime subject revision, bridging gaps in personalized learning access outside the classroom for rural learners.

Glorious Kindergarten & Pri School, Kampala is to exhibit two projects; 1. Digital Hymn Book, a Scratch-powered tool for listening and singing gospel songs anytime, making worship fun, portable, and faith-building despite lost print books and 2. Kiducation TV, a vibrant YouTube channel with animated videos on coding, science, and Christian values, transforming dull lessons into engaging, character-building content for young minds.

Joy Centre For Education, Mukono is to exhibit Prayer Request Board, an app for sharing and praying over fellowship needs, creating a safe central hub to unite class communities in faith and support.

Mothercare Pri School, Makindye is to exhibit Salt and Light, a website with Bible stories and values articles, guiding kids to live Christlike lives amid confusing modern influences and limited church access.

Shalom Pri School, Kampala is to exhibit a Hydronic Lift, a safe cardboard-and-syringe hydraulic device for lifting heavy materials to heights, revolutionizing construction sites with affordable, efficient transport solutions.

Shining Stars Nursery And Pri School, Vvumba, Luweero is to exhibit AgriTech AI, an AI-powered web platform for disease detection and soil monitoring, empowering smallholder farmers to boost yields and combat poverty in Uganda.

Smarties Early Learning Centre, Kampala is to exhibit Sow & Know, a digital journal blending garden activities with Christian devotionals, turning underused school plots into interactive hubs for stewardship and hands-on faith education.

Vic View Pri School, Bugembe, Jinja is to exhibit Your Daily Friend, an app highlighting consequences of bad behaviors through Christian teachings, guiding youth away from theft and negativity toward positive, value-driven choices.

Happy Times Pri School, Luweero is to exhibit Our Environment Our Responsibility, a YouTube channel with videos and infographics on tree planting and clean-ups, sparking student-led sustainability to fight environmental neglect.

PROJECTS AT THE FINAL EXHIBITION

After technical vetting, below is the shortlist of 20 school projects which advanced to the finals of the inaugural Edify EdTech Exhibition 2025.

SECONDARY SCHOOLS

Hermitage Community Sec School, Luweero is to exhibit Know Uganda Culture, a virtual museum of traditions and languages, reconnecting youth with their heritage to foster pride and appreciation in a disconnected modern world.

Hope Community High School is to exhibit Wellness Guru, a mobile-first web app for stress management and healthy habits, equipping students with pocket-sized tools to enhance focus, energy, and mental well-being.

Jireh Comprehensive Sec School is to exhibit Jireh Student Tracker, a digital management system automating records and attendance, freeing teachers for better support and streamlining school operations efficiently.

Katikamu SDA Sec School, Luweero is to exhibit Katisco Information Hub, an online platform for instant access to past papers and notes, empowering self-directed study and collaboration to overcome resource shortages for academic success.

Kireka High School is to exhibit Blind Man's Stick, an Arduino-powered ultrasonic sensor device with buzzer alerts, enhancing independence and safety for visually impaired users by detecting obstacles in real-time.

Lwanda High School, Jinja is to exhibit Bible Quiz App, a gamified tool with leaderboards and verse challenges, making Scripture study engaging and retentive for youth struggling with traditional, boring methods.

Najjera High School, Wakiso is to exhibit Irrigation Systems Alert, an affordable Arduino soil moisture sensor with LED and buzzer signals, helping farmers optimize watering to prevent crop loss and promote sustainable yields.

Namanve High School, Mukono is to exhibit CBC Project Showcase Website, a hub displaying competency-based innovations with multimedia, amplifying classroom creativity for community inspiration and value-driven impact.

Panorama High School, Mukono is to exhibit Conduzure, a simple battery-powered conductivity tester with LED and buzzer feedback, demystifying electrical concepts for beginners through hands-on, low-cost circuit learning.

Katosi Winners SS, Mukono is to exhibit A School Waste Reduction and Recycling Program, a Google Sites-powered initiative applying the 3 R's to educate on sustainability, cut plastic waste through sorting and reusable strategies, and build eco-conscious communities for lasting environmental impact.

Judging Criteria

Adjudicators are scoring projects based on key indicators in the following areas:

Assessment Area	Indicators
1. Problem Statement	How significantly does the project address a clear challenge in school, community, or society?
	Identification of the affected users or community
2. Solution	Functionality and demonstration of key features: Does solution work well as expected?
	Feasibility (technical and financial) of the proposed idea / solution: Is solution realistic and doable by the learners using readily available materials?
	Creativity and innovation in the solution design: Does the project demonstrate original thinking, unique features, or creative problem-solving using technology or EdTech tools?
3. Use of Technology and Level of Effort	Appropriate use of technology or digital tools: Does the project show high quality execution using suitable tools, design standards, or code?
	Level of effort: Is the product created having sufficient quantity of content (posts, text, videos, images, materials, code, etc)?
4. Impact and Sustainability	Alignment with the exhibition theme: Does the project embody or promote Christian values such as kindness, stewardship, integrity, service, generosity, justice, hard work, respect, joy, peace or faith in action?
	Does the project demonstrate a viable model for sustainability or income-generation?
5. Project Dissemination (To be Assessed During Pitching)	• Confident, and logical oral presentation delivery by presenters
	• Appropriate use of PowerPoint and multimedia
	• Communication of technical ideas in a correct way with mastery of concepts
	• Exhibiting teamwork and coordination during the project development and presentation delivery
	• Responding to questions appropriately
	• General organization and time management
